

Cutting-edge tablet

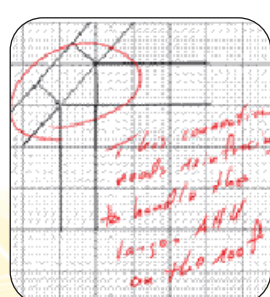

PC based mobile

workforce solutions

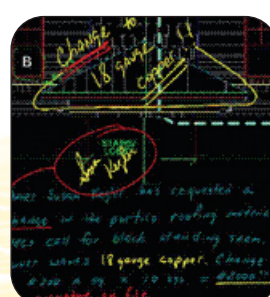

for any industry.

Take a photo
and immediately and easily annotate to add clarifying details.

Make a sketch
and add notes and comments and instantly send the digital envelope or send other documents

Access CAD files
directly and instantly with the ability to annotate, make notes and send.

Simple Interface
With its clean graphics and easy navigation, users, from novice to expert, will be up and running in no time.

Field2Base is a wireless field service and two way communication tool that lets companies dramatically increase the productivity of their mobile workforce. Field2Base's patent pending communication technology gives any company the ability to manage sales force, field service, construction, inspections, homebuilding and engineering field processes and to digitize and optimize information flow to and from the field and back office systems.

Revolutionizing mobile communications

Eight features you can count on in the field.

We're dedicated to delivering mobile solutions that solve real business needs. Case in point: Field2Base, our revolutionary tablet PC based mobile workforce communication solution. This easy to use information tool lets you communicate effectively and completely from the field. The technology behind Field2Base boasts 8 major features designed to enhance productivity, and save you time and money:

- 1. Wireless** Our wireless technology gives you total mobility to communicate with team members in real-time when you are in the field.
- 2. Yellow Pad** Everyone who's ever been in the field has relied on their yellow pad for taking notes. Now Field2Base has the "yellow pad" of the future. Use its "pen" to make notes directly on the screen, which can then be saved and sent wirelessly.
- 3. Simple Interface** Field2Base has a simple interface any user will love. With its clean graphics and easy navigation, users, from novice to expert, will be up and running in no time.
- 4. Digital Camera** In addition to capturing and sending text, Field2Base makes capturing digital photos in the field a snap. It lets you take photos and immediately and easily annotate them to add clarifying details. Now your pictures are worth more than 1,000 words.
- 5. Annotation** Making notes on any digital document – from e-mails and forms to photos and drawings – is easy with the "handwrite" annotation capability of Field2Base. Simply put pen to pad, and write.
- 6. Smart Forms** It's another intelligent feature of Field2Base. With it, you can transform standard paper forms into digital data that can be sent wirelessly to others as a form or intergrated directly into other systems. Once they're converted, it's easy to get them into the system.
- 7. Filing Cabinet** How can something so thin hold so much information? Field2Base gives you a Filing Cabinet that lets you file, organize and store a virtually limitless number of messages, photos, drawings and forms.
- 8. One Touch Send** Once you have your messages, photos, drawings or forms ready to go: one touch and they're off to wherever they need to be. Since you don't have to manage the communication links, you're ready to move on to your next important task.

These 8 features enable Field2Base to provide true Information Mobility that is revolutionizing how field work gets done. The unique technology behind Field2Base provides an ease of use solution that leverages a powerful and innovative approach to wireless communications.
