Sage Timberline Office 9.5 Release Upgrade

December 10, 2008

The 9.5 upgrade you have recently received from Sage Software incorporates many changes to the file structure behind the scenes. Therefore the upgrade needs to be handled carefully and all instructions must be read prior to the attempting this upgrade. If all instructions are followed thoroughly, the upgrade should be a smooth one. However, we recommend that you contact us to discuss specific impact to your installation. If your internal IT provider will attempt this upgrade, we strongly urge that they thoroughly read all documents on the CD and schedule the upgrade during Sage Support business hours. As always, we are available to assist you in any way possible.

Please note that the year end release and update will be available for 9.4.1 and 9.5. Unless you need to have Vista compatibility, we recommend that you postpone this upgrade until after year end is complete.
