Reports

The Power of the Web to Manage Field Information

If you're using paper logs to record daily field information, you are already using valuable time and resources...why not get more out of it? hh² Field Reports can help you collect and organize field information more efficiently, and then allow searching and reporting anytime, anywhere. Make your daily reports more than just a logbook sitting on a shelf...use them to better manage your projects.

- No more illegible paper logs
- No more inaccessible log books
- Track weather, labor, subs, equipment, safety concerns...and more
- Use pre-fills to automate collection of field data
- Search reports with a click of a button
- Access field and project reports from remote locations
- View customizable reports in html, excel, or pdf
- Automatic digital signatures ensure legal authenticity

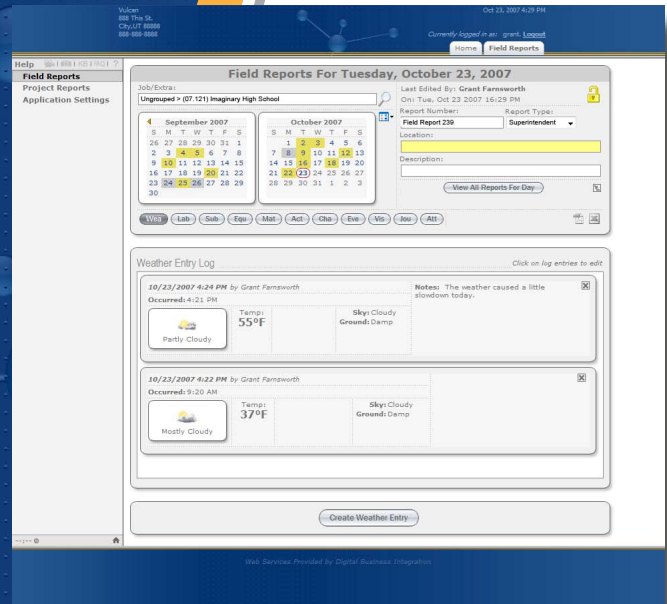

Using hh² Field Reports is easy. Users login with a username and password to a secure website. Field data can then be prefilled or keyed in using simple and intuitive forms. Reports can then be finalized and imported into Sage Timberline Office with a click of a button. Project Reports brings in critical project management and job cost data from Sage Timberline Office. A host of reports can then be generated on demand.

With hh² Field Reports, there are no software, hardware or IT infrastructure costs in order to take full advantage of using it. You pay one low monthly subscription fee and that's all. With plans starting as low as \$24.50 per month, cost savings add up fast.

To learn more about what hh² Field Reports can do for you company, please call us or visit us on the web to schedule a brief demonstration. There's no better way for construction companies with remote sites to track the daily progress of their jobs.

SAGE TIMBERLINE OFFICE

The Online Advantage:

Because hh² Field Reports is a hosted solution accessible anywhere you have an active Internet connection, you never have to worry about software, hardware, IT infrastructure, installation, upgrade or maintenance costs. It's all done automatically behind the scenes.

There are no big upfront investments and no long term contracts to tie you down. In addition, because all your field report data is stored in a secure data center in one unified database, you never need to worry about backing up, syncing or keeping your data up-to-date. All information is updated in real-time which goes a long way toward keeping everyone well informed and working together on the same page.

The Technological Advantage:

hh² Field Reports feels like you're using software installed on your computer even through you're simply using a Web-browser. This is made possible through using the latest technological advances including:

- Windows Server 2003
- SQL Server 2005
- AJAX
- XML
- Web Services
- .NET Framework 2.0
- Windows Clustering
- Storage Area Networking

The Secure Advantage:

With hh² Field Reports, all of your data is hosted offsite in a secure data center. This offers many security and high availability advantages over hosting the data yourself, such as:

- Automatic Encryption
- IP Address Filtering
- Access Logs
- Configurable Password Protection
- 24 Hour Manned Datacenter
- Redundant Utility Connections
- Redundant Internet Connections
 - N+1 UPS Battery Backup
 - Diesel Generator Power Backup

Key Features:
