

Maximize Sage 300 CRE with

Designed exclusively for Sage 300 CRE and fully integrated, Timberscan eliminates the manual paper process and provides your accounting and operations staff with an easy to use, easy to access paper-free solution.

Timberscan increases efficiency by automating your workflows and providing you full visibility into all documents and content, saving you money in administrative overhead. Timberscan's leading edge, powerful and proven technology is currently utilized by over 27,000 users. Our focus since 2004 has been to provide top-of-the line software and exceptional support for our clients.

A/P Automation

- Fully integrated with Sage 300 CRE. Timberscan is the only A/P automation program where A/P data entry works exactly like Sage with the same data entry elements and compliance warnings
- Cloud-based Mobile Approval is available for easier approval processing
- Optical Character Recognition available to reduce or eliminate A/P data entry
