ANY DEVICE | ANY TIME | ANY WHERE

ONE PLATFORM FOR COMPLETE RESOURCE MANAGEMENT

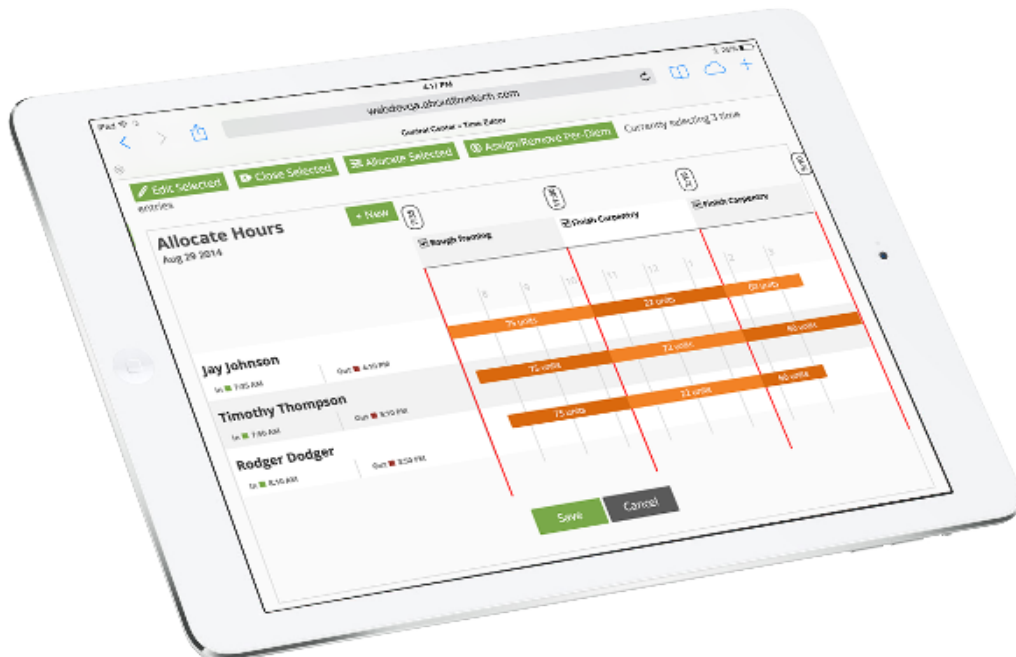

COMPLETE SUITE

WorkMax is a fully expandable platform of tools to connect your team and help manage your mobile, remote and local resources. Our complete suite is fully configurable; simply plug in modules to create the perfect solution geared for your current and future business needs.

TIME

Your people are your most valuable resource and time is money. Our TIME module is built for your entire workforce including mobile, remote and office staff. Connect your team, capture accurate time data and manage workforce labor with precision accuracy and efficiency.

ONE PLATFORM FOR COMPLETE RESOURCE MANAGEMENT

ASSETS

Where are all of your company assets, tools and equipment? Who has what and what is being used? Whether your assets are mobile, remote or local, our ASSETS module helps your team keep track of asset usage, location and assignment, while also eliminating loss.

FORMS

Paper forms slow your team down. Going paperless using digital form collection is more efficient for everyone. The paper forms you use today can be built digitally in our form builder and then deployed to mobile devices where your team can easily capture rich, accurate form data.

INTEGRATE WorkMax With Others

Get data **IN** and **OUT** of WorkMax with ease.
Data imports and exports can be **SCHEDULED** or **ON-DEMAND**.

ONE PLATFORM FOR COMPLETE RESOURCE MANAGEMENT

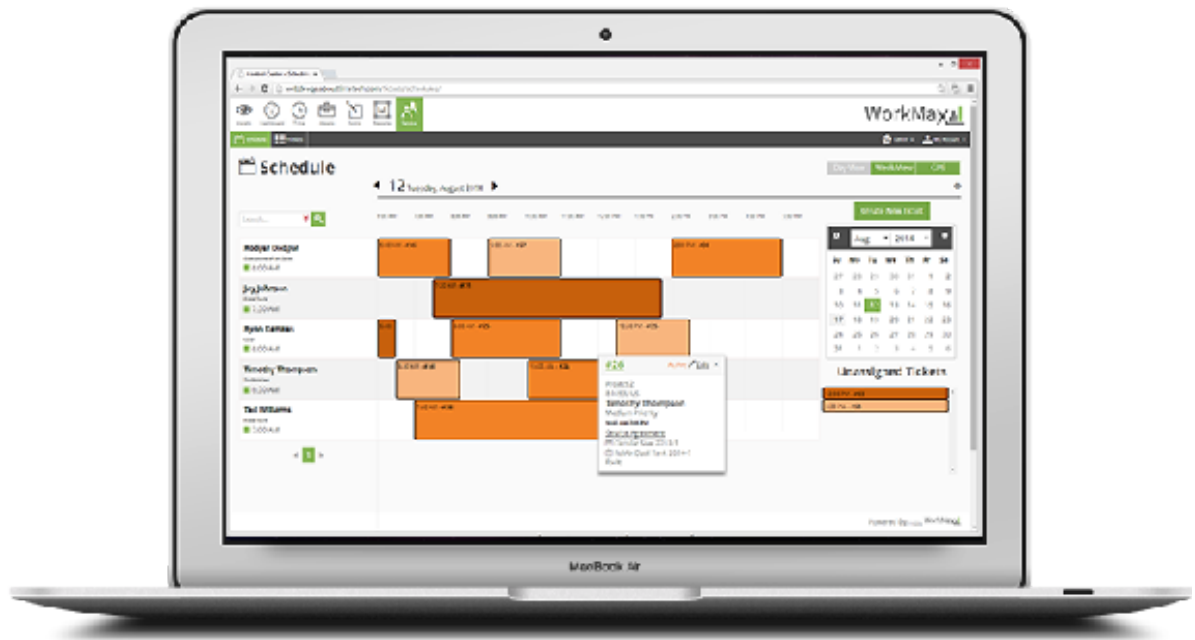

SERVICE

The WorkMax SERVICE module takes the time, data-entry and stress out of managing your service schedule and dispatching. Serve customers better, maximize field service utilization and keep your team in sync by always having the right people in the right place at the right time.

INSIGHT

You simply can't be everywhere all of the time. INSIGHT provides 360 degree real-time views of the data and metrics of your operations and resources across all of your teams. Make better decisions quicker with instant visibility of your entire network of resources.
