

When you combine Acumatica with Assignar, you create a complete operations management solution that provides a more holistic view of your business's financials.

ERP data like workers and equipment flow directly into Assignar's scheduling and tracking solution, and timesheet and field data flows back into Acumatica for payroll and invoicing.

IMPROVE EFFICIENCY
Get a more complete view of your business by automatically tying together two of the most important elements of a project: budget and schedule.

EXPEDITE PAYMENTS
Receive more accurate data out of both systems by eliminating errors caused by manual data entry and cut back on discrepancies that cause delays.

INCREASE PRODUCTIVITY
The real-time flow of information allows you to make better, more informed decisions faster and keeps projects on schedule and within budget.
