Gain Real-Time Insights into Your Construction Project Data with Procore

The ability to understand where money is flowing on your construction project - whether you are managing the job site or in the accounting office - is essential to the financial health of your entire business.

The Procore-built connector for Acumatica paired with Acumatica's superior field capabilities allow you a 360° view of vital project data and finances.

Acumatica Construction Edition with the Procore-built connector gives teams in the field and office the ability to share vendor, project, budget, commitment, change order, and project profitability data with just one click. This allows key users to make more informed decisions that positively impact the bottom line.

The ability to input and receive data anytime, anywhere, on any device, and synchronize between platforms means greater efficiency and more time for other tasks: no more entering the same information in two different systems. In addition, communication between the platforms supports improved collaboration between teams working in the office and on the job site.

Procore is a leading provider of cloud-based applications for construction. Procore connects people, applications, and devices through a unified platform to help construction professionals manage risk and build quality projects safely, on time, and within budget.

"All of our PMs are using Procore and it's integrated with Acumatica, so everything starts in Procore – the budget, the cost, all the commitments or subcontracts. Once it's approved, it comes through the ERP integration tool."

–Jay Feinman, CFO, Tester Construction Group
