

GCPAY

sage 300 Construction
and Real Estate

Integration partners since 2003

How GCPay Works with Sage 300 CRE

- Pulls commitments from Job Cost module into GCPay
- Pulls approved change orders from Job Cost or Project Management
- Validates current commitment amounts between GCPay and Sage 300 CRE
- Pulls compliance including general liability, auto insurance, workers comp, and more from Sage
- Pushes approved applications for payment to Accounts Payable

How the Integration Reduces Construction Risk

- Ensures project reports + financials are accurate
- Lien waiver management reduces liability risk and keeps documents organized
- Enhances subcontractor compliance requirements, forcing subs to provide required documents prior to submissions
- Controls change orders ensuring only approved change orders are billable by contractors
- Provides automated notifications to project management team

GCPAY and Sage 300 CRE

GCPAY

HOW GCPAY **ENHANCES SAGE 300 CRE**

Integrated Commitment Management

- Pushes subcontract commitments and commitment change orders automatically
- Protects original contract and previously billed values
- Communicates instantly to ensure projects remain up to date

Automated Payable Import

- Reduces time spent with data entry
- Eliminates posting errors and omissions
- Slashes processing time for accounting teams

Instant Project Coordination + Validation

- Ensures contractors' billing values never exceed commitment amounts
- Provides error-free job cost reporting
- Supports management with on-demand access to accurate project information
