HYPHEN HOMEFRONT Accordant

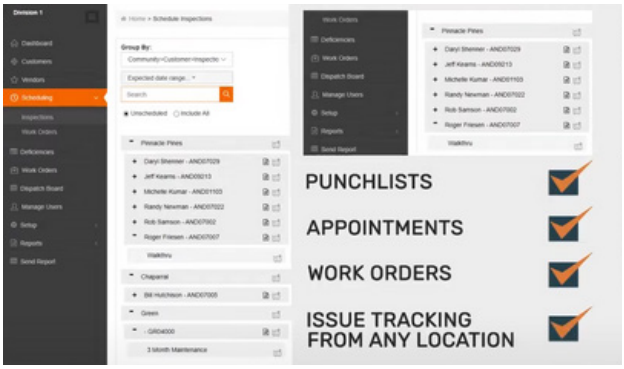
Accounting + Operations

# Our Builder-Centric ERP Integrated Into Your Accounting System

## Build Better with Hyphen HomeFront

Hyphen HomeFront is a fully integrated Builder ERP solution that allows Builders to manage build processes from sales and CRM to service and warranty in one easy-to-use system without replacing your accounting solution.

In today's residential construction market, success for Home Builders is measured by how efficiently you run your business, maximizing profits at every stage from construction to service and warranty. To stay ahead, Builders must prioritize flawless communication throughout their business, and with vendors and sub-contractors. HomeFront provides real-time information to make timely business decisions and build efficiencies that eliminate costly mistakes.



Every stage of the build process comes with large volumes of information - specifications, approvals, notifications and transactions, all of which are interconnected. Hyphen HomeFront helps Builders ensure the integrity of information throughout the entire building process. No need to replace your back-end accounting solution either. Hyphen HomeFront integrates seamlessly with Sage 300 CRE, Sage 100 Contractor, Sage Intacct, QuickBooks and other leading solutions.

## Hyphen HomeFront: An Integrated, Comprehensive ERP Solution for Home Builders

Hyphen Solutions, the leading software provider to the home construction industry now offers Hyphen HomeFront, an on-premise software solution that manages the entire build cycle in one easy-to-use management system. Hyphen HomeFront works seamlessly with popular accounting systems such as Sage 100, Sage 300 CRE and Sage Intacct Construction to ensure immediate and accurate sharing of customer and cost information across all departments in the Builder's company.

Sage

## Maximize Your Profits at Every Stage of Your Construction Process without Replacing Your Accounting Solution

1. **Consolidate CRM & Sales Management**
   Execute sophisticated campaigns and track prospects to closing. Manage contracts, selections, change orders and documents.
2. **Speed up Estimating & Purchasing with Precision**
   Real-time budgeting and PO release driven by approved sales contracts and change orders. Automated 3- way communication between estimating, sales and the field keeps everyone in sync.
3. **Share Schedules with Team, Customer and Trades**
   Easily communicate with Trades and Suppliers, or manage and share schedules with Hyphen's BuildPro cloud solution.
4. **Strengthen Supplier Relationships**
   Link Trade partners directly with Hyphen SupplyPro. Streamline PO handling, approvals, and payments. Built-in alerts notify you in real-time of schedule changes, PO changes or project updates.
5. **Optimize Client Satisfaction with Service & Warranty**
   Coordinate and control service work from the back-office or the field. Information and documents from sales through construction are available at all times. Drag and drop scheduling of appointments and work orders.
6. **Automate Information Sharing**
   Automate information exchange within the office and to your customers and vendors. Critical notifications and real-time reports delivered without delay.
