## Put construction HR & payroll on autopilot.

### Payroll reporting and compliance

From complex pay rates and certified payroll to union reporting and fringe offsets, Miter keeps you compliant without the administrative headaches.

### Precise job costing

Gain complete visibility into your finances by breaking out hours and earnings by job, cost code, and other dimensions before pushing back into Sage 100 for job costing.

### Tax filing & direct deposits

Simplify quarter-end with fully-automated state and federal tax filings, child support garnishments, and employee W2s for any job in any state.

### Easy employee portal

Provide direct access to employee pay stubs, onboarding materials, withholding forms, and PTO requests in a mobile-friendly portal.

Eliminate double entry and enable real-time job costing with a seamless API integration.

"It's much easier to download and export the reports we need. We used to build everything manually in Excel and have to match up the columns – now it's just a few clicks. We were always chasing the burden rate. Now with Miter, we're using real numbers – workers comp, tax burdens, fringe benefits – and getting much closer alignment between our WIP and financials."

Stephanie Gill Steele,  
VP of Finance and HR,  
McCusker-Gill
